in Our ISO 17025–Accredited Laboratory**

Respira ResQ

Symptoms of respiratory tract infections were once regarded as an inconvenience many of us tolerated as we carried on with our busy schedules. Yet with a growing awareness of airborne disease transmission, managing symptoms and shortening their duration has never been more important.

Respira ResQ features an African geranium root extract (PelaPower™) clinically researched for the relief of symptoms including persistent cough, runny nose, sore throat, and mucus accumulation associated with upper respiratory tract infections such as the common cold, bronchitis, laryngitis, and pharyngitis.

Respira ResQ defends your health with several distinct actions. Initially, it deters bacteria from sticking to cells lining the respiratory tract as it breaks down stubborn mucus within airways. It also helps stimulate the production of white blood cells and other beneficial anti-infectious compounds. This naturally sourced extract additionally causes microscopic hairs on the surface of the lungs cells to beat faster as they expel bacteria-laden mucous from the lungs. This process called cytoplasmic streaming is essential for respiratory function.

Getting symptoms under control is vital before going back to school or the workplace. Suitable for children aged six through adulthood, make **Respira ResQ** your family's natural choice the next time a cold or flu hits home.

Make Life Better · newrootsherbal.com

Each vegetable capsule contains:

PelaPower™ (organic geranium
[*Pelargonium sidoides*] root extract) 20 mg

Other ingredients:

Microcrystalline cellulose, vegetable magnesium stearate, and silicon dioxide in a non-GMO vegetable capsule composed of vegetable carbohydrate gum and purified water.

V0746-R1 · NPN 80114348

Directions of use:

Adults and adolescents ≥ 12 years old: Take 1 capsule three times daily or as directed by your health-care practitioner. **Children ≥ 6 years old:** Take 1 capsule twice daily or as directed by your health-care practitioner.

Manufactured under strict GMP (Good Manufacturing Practices).
